

Quantum Computing Project Review

Quality of Work:

- 2 points
- Outline could be more clear. Some parts do not seem to be relevant such as the list of companies. Would remove irrelevant parts and add more detail to the rest. Could also add more about the methods used for research in this project.

Intellectual Merit:

- 3 points
- The project looks to be interesting and substantial. It appears to be feasible to do within a semester.

Video:

- 0 points
- Video is missing
