

Max O. Peer review 2 of Quantum Computing paper

Quality of Outline: 2/3 – I thought that this was a nice outline and gave a good depiction on what the paper is about. TI would add more content to the outline so that it will help get a structure for the paper. All in all, looks like a fairly good outline and good luck on the paper.

Journal: 0/3 – No Journal Selected.

Video: 0/3 – There was no video to review.
