# Quality of Draft

- Score: 3
- The README file is the same as last time. It clearly states the function of the project.
  - I am interested in the accompanying data drive; I wish they had added more detail as to the function of the drive or what will be on it.
- I appreciate that they have a draft of the paper and a separate document for their sources.
  - From experience this makes it easier to find all the information, and they can format the sources they keep and delete any unused sources later.

# Journal

- Score: 0
- Will change score once I have access to the draft

# Video

- Score: 0
- Will change the score once a video is posted
